

Fortune 100 companies worldwide rely on Global Vision to help them bring their packaged products and documents to market quickly, accurately and efficiently.

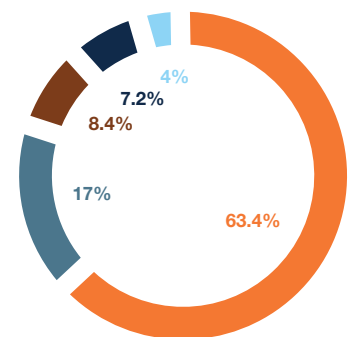

Global Vision was the first that dared to do it.

Over a decade ago, Global Vision led the migration from manual to automated artwork inspection. For most organizations ensuring artwork and document accuracy remains a daunting and costly task. That is why **leading companies worldwide rely on our industry expertise and solutions** to help them bring their packaged products and documentation to market quickly, accurately and efficiently. **And we continue to dare to do it today.** Our latest innovations are shaping the future with the most advanced methods of ensuring artwork and document accuracy.

Global Vision in the Marketplace

- **Pharmaceutical Manufacturers**
- **Consumer Good Manufacturers**
- **Printing & Packaging**
- **Graphics**
- **Legal, Banking, Publishing...**

Artwork Inspection Product Suite.

Our Artwork Inspection Product Suite is aimed at reducing artwork errors commonly found on packaging or marketing materials. The solutions help professionals quickly, easily and accurately compare graphic files for differences from the creation through print stages.

Text Management Product Suite.

Our Text Management Product Suite dramatically eases the challenges professionals face when managing and ensuring the accuracy of their critical documents. Our text comparison technology helps control content accuracy at every stage of the workflow.

Proven solutions. Proven Benefits.

Our customers tell it like it is. They reap real-business advantages from our solutions. Here's what they tell us they've achieved by choosing Global Vision....

- **Accelerated time-to-market**
- **Reduction in quality control issues**
- **Increase in productivity**
- **Risk reduction by avoiding recalls**
