

Printers: Ensuring Print Perfection

01 | The Issues

The printer industry is constantly battling with tight customer deadlines, cost effectiveness and print perfection. In order to achieve these things it is important to ensure complete accuracy with each and every print job.

One small error can spell disaster and possibly expensive reprints for any printer.

Printers need a quick, easy-to-use and affordable solution for ensuring accuracy, quality and efficiency.

- Highly time sensitive environment
- Threat of costly, time consuming reprints
- Ensuring the integrity of the customer file

02 | The Solution

An innovative system that verifies files (digital or hardcopy) to the customer print or plate in order to catch undetected defects and errors before it's too late.

Easily Inspects:

All graphical & textual elements for additions, omissions and any differences.

03 | The Benefits

- Enables fast and accurate inspection of any type of print job.
- Increases confidence in the integrity of each print job.
- Minimizes the chance of errors occurring during the print process.
- Significant decrease in costs associated with reworks, long inspection times and inefficiencies.

“ Everything we print

*has to be perfect each and every time.
Global Vision makes that happen..”*
