Case Study

Pre-Press Company achieves Zero defects

Making the move to automation with Global Vision

Autumn Graphics Ltd.

"The benefits & comfort level that are provided by Global Vision's fully digital comparison is unachievable with a manual system."
~Ben Abray, President Autumn Graphics.

Autumn Graphics called on Global Vision to help them ensure the accuracy of their production files during the inspection process.

Autumn Graphics is a pre-press & graphics management company. Their portfolio includes a wide range of packaging graphics including labels, inserts, coupons & promotional items.

Brand Protection!

CHALLENGES

* Manual inspections
* Hardcopy proofs only

Handling all the artwork inspections manually can be quite arduous and time consuming. "Before the Global Vision system was installed, our proofreading department could only inspect hardcopy proofs,"says Autumn Graphics President, Ben Abray. "Using hardcopies, the customer artwork approved proof would have to be overlaid with the contract proof generated from production. The two were then visually inspected for differences".

SOLUTION

* Global Vision's Scan-TVS Proofreader

The implementation of the Scan-TVS Proofreader has allowed Autumn Graphics to inspect all final files to the customer supplied proof (be it a PDF or hardcopy) without the worry of having to manipulate the customer file. According to Autumn Graphics, this has proved to be invaluable in developing a more accurate inspection process. "Global Vision really helped us develop a proof-reading process that we are confident using every time."

BENEFITS

* Cost savings
  in materials due to reduction in rework by proof-reading digitally before any proofs are produced
* Reduce inspection time
  by automating the proofreading process
* Reduce errors
  due to consistency and accuracy of the technology
